Certificate Course

1. Certification in Advanced Clinical Examination & Ocular Disease Screening

Offered by The Vision Doctor Academy, Chennai
In association with Aradhana Eye Care Hospital

This certificate course is designed to enhance optometrists' clinical examination skills and strengthen their ability to identify common ocular abnormalities and recognise conditions requiring further evaluation or referral.

The program combines theoretical learning, practical demonstrations, supervised clinical exposure where available, and case-based discussions covering comprehensive eye examination, anterior segment assessment, tonometry principles, posterior segment evaluation, ocular disease screening and clinical decision-making.

Course Details

- **Duration:** 4 Weeks
- **Mode:** Hybrid
- **Eligibility:** B.Optom graduates and qualified optometrists, Diploma in optometry graduates
- **Course Fee:** ₹10,000
- **Batch Size:** 10–15 participants

What You Will Learn

- Comprehensive clinical eye examination
- Slit-lamp examination and tonometry principles
- Anterior and posterior segment assessment
- Glaucoma, diabetic retinopathy and other ocular disease screening
- Interpretation of diagnostic findings and identification of referral indications
- Clinical documentation and case presentation

Certification

Participants who successfully complete the course requirements and assessments will receive a **Certificate in Advanced Clinical Examination & Ocular Disease Screening** from The Vision Doctor Academy.

2. Certification in Retinal Imaging & Diagnostics

Advance Your Skills in Retinal Imaging and Clinical Interpretation

Develop the skills to understand retinal imaging technologies, interpret common retinal findings and recognise abnormalities that require further ophthalmic evaluation.

The Certificate Course in Retinal Imaging & Diagnostics is designed for optometry graduates and qualified optometrists seeking to strengthen their knowledge of retinal assessment, diagnostic imaging and clinical decision-making. The program combines theoretical learning, image-based case discussions and practical demonstrations to build a strong foundation in retinal imaging and ocular disease screening.

Course Details

- Duration: 4 Weeks
- Mode: Hybrid
- Eligibility: B.Optom graduates and qualified optometrists
- Course Fee: ₹10,000
- Batch Size: 10–15 participants

What You Will Learn

- Fundamentals of retinal anatomy and pathology
- Fundus photography techniques and image quality assessment
- Optical Coherence Tomography (OCT): principles and interpretation
- Recognition of common retinal abnormalities
- Diabetic retinopathy screening and grading fundamentals
- Identification of macular and optic nerve head abnormalities
- Understanding retinal imaging findings and their clinical significance
- Recognising urgent referral indicators and appropriate referral pathways
- Clinical documentation and image-based case presentation

Certification

Participants who successfully complete the course requirements and assessments will receive a **Certificate in Retinal Imaging & Diagnostics** from The Vision Doctor Academy.
